

Práctica Wordpress

Nombre estudiante

Kevin Ramirez Soto

Universidad Politécnica

Curso: Organización de Archivos

Profesor: Jose Javier Mata Guerrero

07 de Julio del 2026

Paso a paso.

- Creamos la carpeta "Practica_Wordpress".
- Ejecutamos Visual Studio code y abrimos la carpeta que creamos, luego creamos los archivos correspondientes.
- Cree el repositorio en Github con el nombre de "Practica_Wordpress"
- Abrimos el powershell y ejecutamos el código
`PS C:\Users\kevin.ramirez> cd C:\Users\kevin.ramirez\Desktop\Practica_Wordpress`
`PS C:\Users\kevin.ramirez\Desktop\Practica_Wordpress> git init`
- Realizamos el primer script al archivo .env
- Hice el primer push al git.
- Realice el script de los archivos jenkins file y docker-compose.yml
- Realice otro push al git.
- Salve los cambios.
- Ejecutando el código "docker compose up -d"

```
Windows PowerShell
our branch is up to date with 'origin/main'.

Changes not staged for commit:
  (use "git add <file>..." to update what will be committed)
  (use "git restore <file>..." to discard changes in working directory)
        modified:   .env
        modified:   Jenkinsfile

no changes added to commit (use "git add" and/or "git commit -a")

✔ Image mysql:8.0 Pulled 34.3s
✔ Image wordpress:latest Pulled 42.1s
✔ Network practica_wordpress_wp-net Created 0.3s
✔ Volume practica_wordpress_db_data Created 0.0s
✔ Volume practica_wordpress_wp_data Created 0.0s
- Container db Starting 11.2s
✔ Container wordpress Created 0.5s
Error response from daemon: ports are not available: exposing port TCP 0.0.0.0:3306 -> 127.0.0.1:0: listen tcp 0.0.0.0:3306: bind: Only one usage of each socket address (protocol/network address/port) is normally permitted.

What's next:
  Debug this Compose error with Gordon → docker ai "help me fix this compose error"
  Filter, search, and stream logs from all your Compose services
  in one place with Docker Desktop's Logs view. docker-desktop:///dashboard/logs?appId=practica_wordpress
PS C:\Users\kevin.ramirez\Desktop\Practica_Wordpress> |
```

- Corregí el error y ejecute el código docker compose up -d nuevamente y funciono

```
.env  docker-compose.yml X  Jenkinsfile

docker-compose.yml

-Screens del Pipeline en el Jenkinsfile:

```
Jenkinsfile
1 pipeline {
2   agent any
3
4   stages {
5     stage('Checkout desde Git') {
6       steps {
7         checkout scm
8       }
9     }
10
11    stage('docker compose down') {
12      steps {
13        sh 'docker compose down'
14      }
15    }
16
17    stage('docker compose up -d') {
18      steps {
19        sh 'docker compose up -d'
20      }
21    }
22
23    stage('docker ps verificacion') {
24      steps {
25        sh 'docker ps'
26      }
27    }
28  }
29 }
```

- Accedi al <http://localhost:8080/wp-admin/install.php>

- Hice el último push al Git.
- Luego de ejecutar todo el código apague el docker compose y me fui directamente a Jenkins pero cuando ejecuté el pipeline me dio un error así que tuve que modificar el código.
- Por mas que cambie el pipeline no me funciona haciéndolo desde jenkins web.
